Postdoctoral Research Positions in Condensed Matter Theory at TUM

The quantum Condensed Matter Theory groups, lead by Michael Knap, Johannes Knolle, Sergej Moroz, Frank Pollmann, and Laurens Vanderstraeten expect to appoint one or more postdoctoral fellows in **Fall 2021** (the starting date is flexible). We are looking for candidates who are interested in **quantum condensed matter theory** including: ultracold atomic gases, quantum materials, strongly correlated electrons, disordered many-body systems, nonequilibrium quantum dynamics, and topological phases of matter.

For inquiries, please send your curriculum vitae and a brief research statement. Candidates should also arrange for letters of recommendation to be submitted from two scientists familiar with their work.

Applications and supporting material should be sent to cmt@ph.tum.de by

December 11, 2020

however, later applications may also be considered. Successful candidates will be strongly encouraged to join ongoing international collaborations with leading experimental and theoretical researchers.

Further information can be found at <http://www.cmt.ph.tum.de> .

The postdoctoral fellowship from the Condensed Matter Theory groups at TUM is planned to be offered every Fall.
