

Universität Stuttgart

5th Institute of Physics

Open positions in
Rydberg Atom
Quantum Computing

The 5th Institute of Physics
(University of Stuttgart)
is searching for
PhD and **Postdoc**
candidates to complete our
Quantum Computing team.

In our group, we have started a new project aiming to realize a Quantum Computer Demonstrator with several hundred qubits based on individually controlled Rydberg atoms.

In this context, we have openings for **PhD candidates** and **Postdocs** with strong background in either atom trapping, complex control engineering, or active optics (starting date: March 1st 2021 or later).
